

X3-I03

The X3-IO3 digital input card is designed to collect device status, signal from relay contacts, optical isolation or other forms of signal distribution. It has 24 digital twostate inputs. Inputs are divided into 2 groups of 12 inputs. The card processes signals from the inputs and makes them available to the processor. Each of the inputs is optically isolated. The external contact test takes place with a signal variable over time. The card supports hot-swap capability. Especially useful in harsh industrial environments.

Front panel width 6TE.

Basic parameters:

24V DC ±20% / 80mA Power supply 1 x CAN max 1Mb/s CAN 24 x 24V DC / 15mA Inputs

Front panel function:

LFDs Logic power supply and life indicator

Inputs status

Inne interfejsy:

Switches: 3 x 16-position switch

- module address SW1 + SW2- transmission speed SW3

X3-I06

The X3-IO6 digital output card is designed to control external devices. It has 24 optically isolated digital two-state outputs. The card processes signals from the processor and controls the corresponding output. Output circuits work with 24V DC, with a maximum continuous load of up to 300mA. Total object current for the whole card can not exceed 6A. The card supports hot-swap capability. Especially useful in harsh industrial environments.

Front panel width 6TE.

Basic parameters:

24V DC ±20% / 130mA Power supply CAN 1 x CAN max 1Mb/s Outputs 24 x 24V DC / 300mA

Front panel function:

Logic power supply and life indicator LEDs

Outputs status

Other interfaces:

Switches: 3 x 16-position switch

SW1 + SW2 - module address SW3 - transmission speed

X3-I04

The X3-IO4 digital I / O card is designed to control and measure signals from analog external devices. The card supports hot-swap capability. Especially useful in harsh industrial environments.

Front panel width 6TE.

Basic parameters:

Power supply 24V DC / 150mA (16/0 version) 24V DC / 300mA (16/4 version)

■ CAN 1 x CAN max 1Mb/s

• Outputs: 4 (each can work independently in the mode:

0-5V, 0-10V, +/-5V, +/-10V, 0-6V, +/-6V, +/-2.5V, 4-20mA, 0-20mA, 0-24mA, +/-20v

+/-2.5V, 4-20mA, 0-20mA, 0-24mA, +/-20mA,

+/-24mA)

■ Inputs: 16 / 8 (single 0-10V / differential +/-10V)

Front panel function:

■ LEDs Logic power supply and life indicator

I / O status

Other interfaces:

■ Switches: 7 x 16-position switch

SW1 + SW2 - module address SW3 - transmission speed SW4 - SW7 - output mode

X3-SW14-080402

X3-SW14-080402 is a 14-port Ethernet switch. It has 8 ports for SFP modules, 4 RJ45 1Gb/s ETH ports and 2 SGMII ports on the bus. The card supports hot-swap capability.

Front panel width 6TE.

Basic parameters:

Power supplySGMII24V DC2 ports

Front panel function:

RJ45SFP4 ports ETH, 1Gb/s8 ports, 1Gb/s

■ LEDs SFP transmission state indication
